

NiteDevil™ HD

CAM320

The new CAM320 is based around our best selling analogue dome so it makes a good choice for any installer looking to step into the HD market.

It has a great design that makes it easy to mount indoors or outdoors on a wall, ceiling or even on a swan neck bracket. It has superb NiteDevil and new MIRs technology so it performs fantastically well in low light and IR light.

It is easy to install as all the camera connections are inside the dome case itself so there are no awkward fly leads to hide and it even boasts an extra SD output so you can set it up and test it with your existing analogue test monitor.

And finally of course it uses 1080P @25FPS HD resolution for broadcast quality images so your customer will be thrilled with the results.
